

Name: _____

Date: _____

Earth Science

Across

- 3. energy from living things
- 4. a mound or hill of wind blown sand
- 5. energy from water
- 8. a v-shaped valley eroded by a river
- 10. the preserved remains or traces of a living thing from long ago
- 11. resources that are being used faster than can be replaced
- 14. the continuous movement of water between the earth's surface and atmosphere that recycles water

- 15. the average weather conditions over a long period of time
- 17. resources that can be replaced
- 18. energy from moving air
- 19. the breaking down of rock into sediment
- 21. the earth goes around the sun every year

Down

- 1. energy from heat inside earth
- 2. the earth spins on its axis every 24 hours causing day and night

- 6. the moon appears to change shape in the sky due to the revolution of the moon around the earth
- 7. energy from the sun
- 9. a fan shaped deposit of sediment at the mouth of a river
- 12. the natural rising and falling of the ocean levels caused by the pull of gravity between the moon and earth
- 13. the laying down of sediment
- 16. the condition of the atmosphere at a given time
- 20. the movement of sediment from one place to another
