

Earth Science

Across

8. area/region mostly with hot temperatures

10. movement of continents on earth

11. below the lithosphere and above mantle

13. plates collided

14. theory which the lithosphere is divided into small plates

15. supercontinent

Down

1. change in plates magnetic field

2. scientific theory of plate movement

3. plates slide past each other

4. denser plate goes under and lighter plate goes above

5. flowing fluid cause by temperature

6. Mid-Atlantic Ridge is an example

7. plates divide

9. consist of crust and upper mantle

12. between core and crust
