

Name: _____

Date: _____

Earth Science

Across

- 2. boundary between the mantle and the crust
- 8. area of flat deep ocean basins
- 13. ocean floor
- 14. a layer of sedimentary rock
- 15. earth's earliest confirmed super continent
- 16. sunlit pelagic zone
- 17. shallow part of ocean

19. ocean waters

20. measures wind speed

Down

- 1. scale measuring earthquakes based on their total moment release
- 3. occurring without transfer of heat
- 4. middle pelagic zone
- 5. depressed fault between two normal faults

6. measures elevation with scale or pressure

- 7. underwater topography
- 9. first vehicle to explore the deep sea
- 10. pelagic zone where no sunlight reaches
- 11. rock that water easily moves through
- 12. crust that has risen between two normal faults
- 18. erosion of glaciers
