# Earth Sciene

## Across

4. What form of erosion causes a delta?  
 7. What is the shaking of Earth's surface?  
 11. What is the lowland between hills or mountains?  
 14. Moving water carries rocks and \_\_\_\_\_ downstream.  
 15. What causes earth to change quickly and occurs when rivers overflow?  
 16. What is Earth's center called?  
 17. What is the breaking down of rock into smaller pieces?  
 20. What part of a tree can cause weathering?

21. What is melted rock that has cooled called?  
 22. What is a landform made by a river with steep sides?  
 23. What type of weathering occurs in the desert?  
 24. What forms in cracks of rocks and helps cause weathering?  
**Down**  
 1. What is melted rock underground?  
 2. What force causes a glacier to move downhill?  
 3. Weathering and \_\_\_\_\_ cause changes to Earth's surface.  
 5. What is the outer layer of Earth called?

6. What is the core made of?  
 8. What can happen after a flood?  
 9. What is a feature on Earth's crust?  
 10. What landform is higher than the land around it and flat on top?  
 12. What is a large sheet of moving ice?  
 13. What landform is steep and jagged?  
 18. What is the moving away of weathered material?  
 19. What layer if the Earth is soft, hot rock?
