

Name: _____

Earth Space Science Vocab

Across

- 8. layer below crust
- 9. two plates that slide past one another
- 10. central portion of Earth
- 11. change in magnetic field
- 13. two overlapping plates
- 14. outside part of the core
- 15. supercontinent

- 16. plates moving away from each other

- 17. mantle is made of:

- 20. inside of the core

Down

- 1. collision between two tectonic plates
- 2. two plates moving away from each other
- 3. forming of new areas of ocean's crust

- 4. collision zone

- 5. gradual movement between continents

- 6. earth is divided by plates called:

- 7. lava

- 12. steep walls formed by downward displacement

- 18. mantle is made of this metal

- 19. outermost outer shell

Word Bank

crust
tectonic plates
outer core
rift valley
inner core

magma
pangae
convergent boundaries
nickle
transform boundary

core
continental drift
slab pull
seafloor spreading
mantle

divergent boundaries
ridge push
magnetic reversal
subduction
iron
