

Earth and Atmosphere

Across

3. What percentage of the atmosphere is oxygen
7. Layer of the earth with thick magma
9. How do plants remove CO₂ from the atmosphere
10. Gas causing acid rain
11. Process in the mantle allowing plates to move

Down

1. Layer of the earth made from liquid nickel and iron
2. Process allowing whole continents to shift
4. Largest % of gas in the atmosphere
5. Large pieces of the crust and parts of the mantle
6. Outer layer of the earth
8. Gas allowing animals and plants to respire
