

Earth's Resources

Across

4. A resource of economic value that cannot be readily replaced by natural means on a level equal to its consumption. This includes crude oil, coal and more.

6. All the waters on the earth's surface, such as lakes and seas, and sometimes including water over the earth's surface, such as clouds.

7. A solid, naturally occurring, inorganic substance.

8. A fuel derived immediately from living matter.

9. The envelope of gases surrounding the earth or another planet.

10. The regions of the surface and atmosphere of the earth or another planet occupied by living organisms.

Down

1. The surroundings or conditions in which a person, animal, or plant lives or operates.

2. A source of supply, support, or aid, especially one that can be readily drawn upon when needed.

3. Any resource, such as wood or solar energy, that can or will be replenished naturally in the course of time.

5. The rigid outer part of the earth, consisting of the crust and upper mantle
