

Name: _____

Date: _____

Earth's Rock, minerals, and geological events

Across

2. Convection current
4. Divergent boundary
13. Luster
14. Earth's crust and solid upper mantle, broken into tectonic plates
16. Mountain building
17. Subduction
20. Convection

23. Convergent boundary

24. Rock cycle

Down

1. Relative density
3. VE
5. MR
6. Earthquakes
7. Sedimentary rock
8. Transform boundary
9. Tectonic plate

10. The soft layer of the mantle on which the lithosphere floats.

11. Plate boundary

12. IR

15. Ocean basins

18. Hardness

19. Mineral

21. Streak

22. Density
