

Earth's Structure

Across

2. What are underwater mountain chains that run through the Earth's basins?
4. What is the transfer of energy through empty space?
5. What was the super continent called?
8. What is the measure of how much mass there is in a volume of a substance?
9. When one plate is subducted beneath the other what does it form?
10. Who came up with the theory continental drift?
11. What is the plate boundary were they slide past each other?

14. What is new crust forming a part of?

15. Where do the edges of the plates meet called?
17. What pieces move around as plate tectonics?
18. What is the plate boundary that sea floor spreading happens at?
19. What is the transfer of heat by the movement of a heated fluid?
20. What type of boundary happens when two ocean crusts collide?

Down

1. What usually happens at a transform boundary?

3. What plate boundaries collide together?

6. Where do convection currents flow?
7. Where do convection currents rise?
12. Convection currents cause plates to move, producing changes in Earth's----
13. Who proposed that the lithosphere is broken into separate sections called plates?
16. What forms when two continental plates collide?
