# Ecological Relationships

## Across

- 2. is a relationship in which one organism benefits and the other organism is harmed
- 3. the action or process of adapting or being adapted
- 4. an animal that is hunted and killed by another for food
- 7. the disguising of military personnel, equipment, and installations by painting or covering them to make them blend in with their surroundings

- 10. a relationship between individuals of two species in which one species obtains food or other benefits from the other without either harming or benefiting the latter

## Down

- 1. begins in a place where there is no soil
- 5. an animal that naturally preys on others
- 6. the natural home or environment of an animal, plant, or other organism.
- 8. a relationship in which both species benefit
- 9. a shallow recess, especially one in a wall to display a statue or other ornament
