# Ecology Rocks

## Across

- 7. Interaction between organisms that harms both species
- 9. Food chains linked together
- 11. Non-living parts of an ecosystem
- 12. A way to estimate a population
- 13. An organisms role in the ecosystem
- 14. Process of evolving populations in a lifeless area
- 15. A chart that shows how energy is transferred from one trophic level to another

17. Organisms that break down dead waste

19. A living thing in the ecosystem

20. The process of nitrogen being converted

## Down

1. A species that everything in an ecosystem depends on

2. Plant Eater

3. Using past behavior as an indication of a species population

4. The number of a specific species

5. The first species in an ecosystem

6. Variety of life in an ecosystem

8. The process of species adjusting to their environment

10. Organisms that make their own food

16. Community of living and non-living organisms

18. Living Thing
