# Ecology

## Across

- 5. Physical, non-living.
- 6. An organism that relies on other organisms for energy and its food supply.
- 8. An area where an organism lives including the biotic and abiotic factors that affect it.
- 9. Assemblage of different populations that live together in defined areas.
- 10. A group of individuals of a same species in the same area.

## Down

- 1. A group of similar organisms that can breed to produce fertile offspring.
- 2. Any living part of the environment with which an organism might interact.
- 3. All the organisms that live in a place, together with their non-living environment.
- 4. A series of steps in an ecosystem in which organisms transfer energy by eating or being eaten.
- 7. A scientific study between organisms.

## Word Bank

- |               |                |            |          |
|---------------|----------------|------------|----------|
| ecology       | abiotic factor | ecosystem  | consumer |
| species       | population     | food chain | habitat  |
