

Name: _____

Date: _____

Electric cells

Across

- 3.** Output energy in an electrical cell
- 5.** Device that produces electricity by converting chemical energy into electrical energy
- 8.** Measure of the amount of potential energy stored in a cell or used by a circuit component
- 10.** A solid substance through which an electrical current enters or leaves a cell
- 11.** Input energy in an electrical cell

Down

- 1.** The mediums for the movement of ions within cells
- 2.** Metal than can be used as the negative terminal of a cell
- 4.** An instrument used to measure voltage
- 6.** More than one cell connected together
- 7.** Abbreviation for light emitting diode
- 9.** Metal that can be used as the positive terminal of a cell
