

Name: _____

Electricity

- | | |
|--------------------------------------------------------------------------------------------------|---------------------------------|
| 1. Electricity | A. 35% |
| 2. A good conductor | B. Volt |
| 3. Nonconductor is also known as | C. Microcurrent |
| 4. Changes AC to DC | D. Milliampere |
| 5. Rapid, interrupted current flowing in one direction then in the opposite direction | E. Copper |
| 6. Unit that measures the pressure or force that pushes electric current forward | F. Deincrustation |
| 7. Measures the strength of an electric current | G. Ohm |
| 8. Current used for facial and scalp treatments is measured in | H. Cathode |
| 9. Measures the resistance of an electric current | I. Wavelength |
| 10. Prevents excessive current from passing through a circuit | J. UL certified |
| 11. All electrical appliances you use should be .. | K. ultraviolet light |
| 12. Currents used in electrical facial and scalp treatments | L. 60% |
| 13. Positive electrode | M. Iontophoresis |
| 14. Negative electrode | N. Movement of electrons |
| 15. Form of anaphoresis; Used to treat acne, milia, and comedones | O. Catalysts |
| 16. Process of infusing water-soluble products into the skin with the use of an electric current | P. 5% |
| 17. Extremely low level of electricity that mirrors the body's natural electrical impulses | Q. an insulator |
| 18. Also known as violet ray | R. Anode |
| 19. The distance between two successive peaks of electromagnetic waves | S. Fuse |
| 20. Visible light makes up how much of natural sunlight | T. Tesla high-frequency current |
| 21. Invisible infrared light makes up how much of natural sunlight | U. Rectifier |

22. Invisible ultraviolet light makes up how much of natural sunlight?

23. The shortest and least penetrating light of the spectrum

24. Substances that speed up chemical reactions

V. Modalities

W. Ampere

X. Alternating current
