

Name: _____ Date: _____ Period: _____

Electricity Vocabulary

Across

1. The electric force of the current
4. A circuit where the current can go through multiple paths
7. The unit of current
10. An object that takes in electricity
13. An electric lamp
14. The unit that represents the showing of electrons
16. A device used to measure the current in a circuit
17. An object where it slows the flow of electrons

19. A unit where the electric pressure of the current is represented

20. A complete path of electricity

21. A property where it halts the flow of electrons

Down

2. A combination of two or more pieces that produce electricity

3. The direction of positive charge flow

5. A device that measures multiple quantities or forms of electricity in a circuit

6. A circuit where there is only one path of flow

8. A part in which if two or more are combined, a battery is formed

9. An object where it measures voltage

11. Represents $V=IR$

12. The amount of power something has

15. The direction of negative charge flow

18. An object where the flow of electrons can get off in one motion
