

Electricity and Magnetism

Across

2. Opposite charges will
4. Electric Charging by direct contact
6. Type of circuit with multiple loads but a single pathway
7. When voltage is increased in a circuit, then the current will
8. A compass needle is attracted to Earth's magnetic

9. Iron, Nickel and cobalt are

10. Electric Charging by rubbing two objects together and transferring electrons

Down

1. The flow of electrons is
3. Earth's geographic south pole is the magnetic
5. Constructed with coiled wire and a battery
