

Electromagnetic waves

Across

- 2. Frequency modulation
- 3. What is a very common pigment that is dark green
- 7. What's in the far right if the electromagnet spectrum
- 9. What are yellow, magenta and cyan
- 12. Is the color we see reflected or absorbed

- 13. Amplitude modulation
- 14. What does the prism do
- 15. What's in the far left of the electromagnet spectrum

Down

- 1. What are red, green and blue light
- 4. A pyramid-shaped object made of transparent matter

- 5. What waves does tv use
- 6. What do red green and blue make
- 8. What color has the shortest wave length
- 10. What color has the longest wave length
- 11. What colors can the human eye see
