

# Emergency Drug Kit

## Across

- 6. Hypocalcemia, uterine atony, hyperkalemia, cardiotoxicity?
- 8. Positive inotrope
- 9. Cerebral edema
- 11. Stimulate respiration?
- 13. Shock, hypovolemia
- 14. Ventricular arrhythmias

- 15. Asystole, hypertension, alternative to epinephrine
- 16. Addisonian crisis, severe allergic reaction
- 17. Status epilepticus?
- 18. Hypoglycemia?

## Down

- 1. Used to increase systemic oxygen content

- 2. Pulmonary edema (from chf)
- 3. Severe allergic reaction
- 4. Shock, hypotension
- 5. Correct metabolic acidosis
- 7. Bradycardia
- 10. Opioid reversal?
- 12. asystole, severe anaphylaxis

## Word Bank

Sodium bicarbonate  
 Doxapram  
 Prednisone sodium  
 Mannitol  
 Colloid solution

Diazepam  
 Dobutamine  
 Dextrose 50%  
 Oxyglobin  
 Furosemide

Lidocaine  
 Atropine  
 Dexamethasone  
 Vasopressin

Naloxone  
 crystalloid solution  
 epinephrine  
 Calcium gluconate
