# Energy

## Across

- 2. Materials that energy can pass through
- 3. When an atom splits
- 7. Travels in the form of a wave
- 8. Energy that can be shifted from one form to another
- 9. Energy from random vibrating atoms

10. Stored energy that is released when chemicals combine

13. Energy from the electrons

14. When an atom forms

15. Energy from inside the nucleus

## Down

1. Energy from the vibrations of atoms

4. Energy that is stored

5. Energy in the form of motion

6. Materials that stop electricity

11. The ability to cause change

12. Energy that is doing work
