

Name: _____

Date: _____

Energy Resources

Across

- 5. Energy resources obtained from fossils
- 8. Flow of hot gas or liquid, carrying heat energy with it Convection
- 9. Anything which is an energy source.
- 10. When a liquid changes to vapour below boiling point.
- 11. Bad conductors of heat

Down

- 1. Energy resources which are limited and cannot renew itself naturally
Non-renewable

- 2. Materials that allow heat to pass through them

- 3. Energy resources that can naturally renew itself Renewable

- 4. Heat energy travelling as waves through empty space Infra-red

- 6. Energy obtained from the nucleus of atoms of some minerals Nuclear

- 7. Energy stored in chemical substances
Chemical
