

Energy Systems

Across

- 7.** A substance that burns to release energy
- 8.** We can test for carbon dioxide gas using which liquid
- 9.** A finite resource made from compressed plants and animals
- 11.** Energy gained from the consumption of food

- 12.** Cannot be created nor destroyed, only transferred from one store to another
- 14.** Released only from nuclear reactions

Down

- 1.** Anything above the ground has
- 2.** Heat energy is also known as
- 3.** Energy is measured in

- 4.** Energy cannot be changed it can only be _____ from one store to another

- 5.** Energy stored as a result of deformation
- 6.** Movement energy is called
- 10.** A form of wasted energy is
- 13.** Energy formed from an object gaining or losing electric charges
