

Energy Transformations

Across

- 5. Type of energy involving electromagnetic waves
- 6. During photosynthesis, radiant energy is transformed into ____ energy
- 9. Radiant energy is transformed into chemical energy during this process
- 10. Gas that is released during photosynthesis

Down

- 1. Compound formed during photosynthesis
- 2. Gas needed for photosynthesis
- 3. Type of energy involving movement
- 4. Chemical energy is transformed into thermal energy during this process
- 7. Contains stored chemical energy
- 8. During digestion, chemical energy is transformed into _____ energy
