

Energy Vocabulary

Across

- 8.** thermal energy beneath Earth's surface
12. energy stored as a result of position or shape
13. energy that can't be depleted when used such as wind or solar power
14. the energy an object has due to motion

Down

- 1.** rich deposits in hydrocarbon mixtures that formed from remains of organisms
2. energy that can't be replaced when used
3. the potential energy that is compressed or stretched
4. energy stored in atomic nuclei
5. energy associated with electric charges

- 6.** practice of finding ways to use less energy or more energy more efficiently
7. energy associated with motion and position of everyday objects
9. sunlight that is converted into usable energy
10. chemical energy stored in living things
11. total potential and kinetic energy of all particles in an object
