

Name: _____

Date: _____

Energy and Fossil Fuels

Across

3. This fossil fuel is extracting from the ground through drilling
6. The energy of motion
7. Fossil Fuels are made up of this kind of material
8. A type of nuclear energy where nuclei divide

10. The form of energy that turns food into energy in our bodies
12. Methane is the main substance that makes up this fuel

Down

1. The element mainly found in coal
2. A type of nuclear energy where nuclei combine

4. stored energy
5. Method of mining above ground
9. Heat energy
11. This is the most abundant fossil fuel in the world
