

Energy by Sawyer Duncan

Across

- 3. energy stored by something that can stretch or compress, such as rubber band or spring
- 4. energy in the form of motion
- 9. energy that is stored
- 10. the energy associated with the motion and position of an object

- 11. the energy produced by electrical charges
- 12. the energy that travels by waves or particles
- 13. the energy produced by vibrating sound waves

Down

- 1. energy stored in chemical bonds
- 2. anything that can fall has this stored

- 5. the energy in the nucleus of an atom
- 6. the internal energy of an object due to the kinetic energy of its atoms and/or molecules
- 7. the energy stored in the bonds of chemical compounds (atoms and molecules)
- 8. the ability to cause change
