# Energy resources

## Across

- 5. Unit for measuring energy
- 6. Fuel used in nuclear power stations
- 9. Disadvantage of wind turbines
- 10. Where fuel is burnt in power station
- 11. This fossil fuel produces most CO<sub>2</sub>

- 12. This form of vaporised water turns the turbine
- 13. Uses falling water and dams to generate electricity
- 14. Turbines look similar to this

## Down

- 1. Sea level moving up and down
- 2. Oil, Gas and Coal

- 3. Fuel from animal or plant waste
- 4. This turns the generator
- 7. Sun produces this type of energy
- 8. Energy produced near volcanoes

## Word Bank

joules	coal	turbine	biofuel	geothermal
hydroelectric	solar	steam	Uranium	furnace
noise	tidal	fan	fossilfuel
