

Name: _____

Date: _____

Engineering Careers

Across

1. Makes robots
4. Prototyping buildings and softwares
8. Manufacturing setting machines
9. Petrol or gasoline
14. Electric traction motors and power electronics
15. Created solar powered technology
16. Work on fertilizer that will improve a farmer
19. Ultrasonic tests on fabricated metal

Down

21. Created Vaccines
22. Created light bulbs
23. Concepts to reality computer applications
24. Compressors, scrubber, and evaporators
25. Listen to safety problems and fix it
26. Manufacturing process for leisure
2. Made wind turbines
3. Several building likes the Eiffle tower
5. Operates Zinc chloride

Across

6. Examines machines
7. Supplies heal transfer and process equipment
10. Created Chernobly
11. Created Marine chronometer
12. Created Nuclear Energy
13. Oil Drilling
17. Phonograph from the revolution
18. Machine used to see molecules
20. Test engines and make sure they work
