

# Epistemological Puzzle

## Across

3. A property of the agent who is making the assertion that is either true or false, but in fact one is in error- the problem is one cannot know that he/she is in error.
5. Epistemology is "Do We Know?"
6. A "justified truth-claim" or a "justified truth-belief."
8. Know-how- "To know" how to deal or handle certain matters.
13. Knowledge is in verification
14. "A proposition is true if, of what is the case, it says, that it is the case; or if, of what is not the case, it says, that it is not the case."

16. A theory of knowledge (on how we know).

18. Is also an attribute of the agent in making an assertion.

19. Which tries to determine in general way what the nature and scope of Human Persons capacity to know are.

20. An epistemological theory that says: knowledge comes through experience (by use of our senses).

## Down

1. Is a condition of error.
2. "Is Knowing Possible?" "How?"
4. Self-evident knowledge

7. It is also called "knowledge." It is not "familiarity," not "awareness of something," not "skill," but "that" a product of asserted judgment.

9. Is knowledge possible?

10. "What supports the proposition," or "that what makes the proposition, or assertion clear and manifest."

11. An epistemological theory that says: reason is the source of knowledge (by use of intellect).

12. "To know that."

15. A position to doubt or to suspend judgement, "to reflect on," "consider," or "examine" in the absence of evidence.

17. An act of accepting or rejecting a proposition.
