

Name: _____

Date: _____

Evidences Of Evolution Vocab Activity #6

Across

1. Process where individuals that have certain inherited traits reproduce higher and live longer.. "Survival Of The Fittest"
2. Structures in different species that are similar because of common ancestry
3. Inherited survival behavior
8. Characteristic that is passed down from parent to offspring
10. Organism's physical appearance
14. English natural scientist who formulated the theory of evolution
15. Comparison of body structures and how they vary

16. Differences among individuals DNA-wise

17. The variety of life in the world or particular habitat or ecosystem
18. Process whereby Earth's life changes over time through population gene changes
19. Similar functions but different structure (doesn't show common ancestry)
20. Remnant of a structure that may have had an important function in a species' ancestors

Down

4. Product of reproduction

5. Physical features of an organism that help it survive

6. How Earth's surface has changed over the years
7. Measure of the ability to survive and reproduce
9. Mistake in genetic coding causing a mutation
11. An organism's genetic makeup or allele combinations
12. The study of embryos and their similarities and differences
13. The scientific study of how living things are classified
