

Evolution

Across

- 1. Physical appearance that help it survive
- 2. Structures that are similar in different places
- 3. Process that creates as plates move away
- 7. Conduct theory of of evolution
- 10. When two plates move together
- 15. Where two plates move past eachother
- 16. Conducted theory of see-floor spreading

- 18. Inherited Behavior
- 19. Name of the single landmass that broke apart
- 20. Comparison of body structures
- 21. Theory that earth's lithosphere is in constant motion
- 22. Change of life over time
- 23. When two plates move away from each other

Down

- 4. Earth change over time
- 5. Similar function but different

- 6. Body part that is thought to once have a use but no longer does
- 8. Ability to survive
- 9. Hypothesis that land on earth drifts
- 11. Conducted Continental drift theory
- 12. Study of Embryos
- 13. Study of how things are classified
- 14. Variety of life
- 17. Where individuals have certain inherited traits to help them survive
