

Name: _____ Date: _____ Period: _____

Evolution

Across

- 3. separation by space
- 6. an idea that is strongly supported by evidence
- 7. differential success in survival and reproduction of individuals
- 11. gradual development of something
- 15. the group of genes available/ present in a specific mating pool
- 16. similarities in the coding sequences

18. inherited characteristics that increase an organisms survival

- 19. natural selection with who they choose
- 20. reproduce at different times of the year

Down

- 1. structures that have no apparent function
- 2. all organisms of a group of species which live in the same area and are able to breed
- 4. new combination of traits
- 5. traits determined by an organisms gene

8. structures in different species with a common ancestor

- 9. first person to purpose mechanism for evolution
- 10. different mating rituals
- 12. favors an extreme phenotype species group of living things that are capable of reproducing
- 13. various structures in different species having the same function but evolved separately
- 14. unborn or unhatched animal or human in its earliest phases
- 17. changes in DNA sequence
