# Extra credit

## Across

- 3. a statement that two quantities are equal: contains an equal sign
- 4. in an equation with two variables, the variable whose value affects the independent variable: for example  $y$  in  $y=x+1$
- 7. a mathematical phrase that combines numbers, operation signs and variables
- 8. the repeated factor in an expression with an exponent
- 11. operations that undo each other, such as addition and subtraction or multiplication and division

## Down

- 1. a phrase that contains numbers and operations
- 2. a mathematical statement that compares two expressions and includes an inequality symbol such as  $<$  or  $>$
- 5. the numerical factor of a term containing a variable
- 6. a number, variable, product or quotient in an expression
- 9. a letter or symbol used to represent a number
- 10. a number, variable, product or quotient in an expression
