

FORCE

Across

2. The other polar end of a magnet

4. The third common metal attracted to magnets

5. Makes up all physical objects

9. The science of matter and energy

11. The opposing sides of a magnet

12. The force of magnets

13. Our first 'force' experiment

15. One of the polar ends of a magnet

16. Power caused from a physical reaction

Down

1. Draw an object closer

3. Used the power of air

6. Another common metal attracted to magnets

7. The force that keeps us on the ground

8. The physical power used to move an object

10. Propel an object away

14. A metal attracted to magnets
