

Factors affecting the water cycle

Across

- 1. The hills ,valleys,rivers and other physical features of the landscape
- 5. the application of controlled amounts of water to plants at needed intervals.
- 6. Without leaves trees lose water through
- 10. : The greatest factor controlling infiltration is the amount and characteristics (intensity, duration, etc.) of

- 11. Plants have special openings called.....
 - 12. an underground layer of water-bearing permeable rock, rock fractures or unconsolidated materials
- Down**
- 2. refers to the movement and filtering of fluids through porous materials
 - 3. The rate from the ocean ,sea and soil increases asincreases

- 4. Air moving across a wet surface Affects the rate of
- 7. The amount of water vapour in the air
- 8. precipitation that did not get (infiltrated) absorbed into the soil, or did not evaporate
- 9. Describes the variety of plants that grow in a particular environment
