

# Factors that influence Ag-Ab reactions

**Across**

- 2. \_\_\_\_ of antigenic determinants
- 7. Number of \_\_\_\_\_ antigen binding sites
- 8. This is precise if the goodness of fit is high
- 9. alkalinity or acidity
- 10. Incubation period
- 11. \_\_\_\_ of the antigenic determinants

**Down**

- 1. Strength of charges in tonic solutions
- 3. \_\_\_\_\_ between reactive sites on antibodies
- 4. hot or cold
- 5. Electrical repulsion between red cells
- 6. Amount of antibodies and antigens
