

# Find the different types of energy:

**Across**

- 1. what energy is obtained by using heat from under the earth's crust
- 3. oil that is pumped from the ground
- 10. semi-liquid form from decayed organisms that lived millions of years ago
- 12. what is the name of the panels that absorb the sun's energy

13. energy that cannot be replaced or remade

15. what is made by decayed organisms that give you electric power

**Down**

- 2. energy that is easily replaced
- 4. Made from dead plants and animals
- 5. organic materials made by microorganisms that contained stored energy of the sun

6. what energy is made by a spinning turbine

7. made from movement of water through dam

8. where does the nuclear energy transform

9. what is the energy that uses light

11. black combustible sedimentary rock found under the earth

14. is used to obtain energy by the movement through it
