

Name: _____

Fossils

Across

- 6. The most likely place to find a fossil.
- 7. A clue to the activity of an animal that lived long ago.
- 9. A type of trace fossil made by a footprint.
- 10. A clue, preserved in rock, about life in the distant past.

Down

- 1. Sap hardened to form a clear, yellow material.
- 2. A fossil imprint left by a plant or animal.
- 3. When you use what you already know to explain your observations.
- 4. When woody material in a tree is replaced with mineral.
- 5. Formed by sediments over time.
- 8. What forms when minerals fill a mold fossil and then harden.
