# Fractures

## Across

2. What type of fracture can stress cause?  
 6. What type of fracture is when the bones penetrates through the skin?  
 7. Fragment within joint capsule.  
 12. Fracture where the bone is weakened by disease.  
 14. A cracking or break of a bone.  
 15. Greenstick, torus, bowing, stress, and transchondral are all what type of fracture?  
 17. Fracture perpendicular to long axis of bone.  
 18. What is the term for the separation of cartilaginous joint surface from main shaft of bone?

19. What is a fracture where fragments are out of normal alignment?

21. Fracture at a diagonal angle compared to the long axis of the bone.

## Down

1. How many steps are there in wound healing a bone?  
 3. fracture line parallel to long axis of bone.  
 4. Fragment outside of joint capsule.  
 5. What is the correct term for the following definition fragment of bone connected to a ligament or tendon detaches from main bone?  
 8. Fracture line encircling bone.

9. What is the term for when fracture fragments are pushed into each other?

10. What is the term for the bending of bone?

11. What type of fracture leaves multiple bone fragments?

13. What type of fracture commonly occurs in young people and the elderly? (splintering of inner bone)

16. What is the term for the buckling in the cortex?

20. What type of fracture is when the bone is contained within the skin?
