# Fresh Water Vocab

## Across

3. the release of water vapor into the air by organisms  
 5. the boundary between drainage areas with streams flowing in opposite directions  
 9. the volume of water that flows within a given time  
 11. movement of water into ground due to the pull of gravity  
 12. downward movement of water through pores and spaces in the soil  
 14. the upper surface of underground water; the upper boundary of the zone of saturation

15. the percentage of the total volume of a rock or sediment that consists of open spaces  
 16. an area along a river that forms from sediments deposited when the river overflows its banks  
 17. the volume of water that flows within a given time  
 19. an area in which water travels downward to become part of an aquifer  
 20. the change in elevation over a given distance

## Down

1. a body of rock or sediment that stores and allows flow of water

2. the area of land that is drained into a common body of water  
 4. the spaces between the rock particles that are filled with water  
 6. spring whose water flows from a crack in the caprock over the aquifer  
 7. the path that a stream follows  
 8. a stream that flows into a lake or larger stream  
 10. an artificial body of water that usually forms behind a dam  
 13. the materials carried by a stream  
 18. forms when water table reaches Earth's surface, the water flows from the ground
