# Freshwater Ecological Concepts

## Across

- 3. Fish spawning migration from salt to freshwater
- 5. Organic matter between 0.50 µm and 1 mm
- 10. Consumers of biofilm
- 12. Biofilm on hard substrate in rivers
- 13. Pulsed high density drift

- 14. Nutrient cycling in rivers

## Down

- 1. Deposit feeding macroinvertebrates
- 2. Process of spreading to a new area
- 4. General term for aquatic plants
- 6. Fish spawning between vegetation

- 7. Surface dwelling organisms

- 8. Predation technique of pike and water scorpion

- 9. Instream primary production

- 11. General limnological term for rivers and streams
