

GEOGRAPHY REVISION

Across

- 2. A gentle wave that deposits material and builds up beaches
- 3. The process which moves sediment in a zigzag pattern along a beach by wash and backwash of waves approaching the shore at an angle
- 7. A wall built close to or along a shoreline to prevent erosion or damage by destructive waves
- 9. A part of a cliff that has separated from the mainland as a result of the erosive effect of waves
- 11. A cage of wire filled with rocks
- 16. To clear the bed of (a harbour, river, or other area of water) by scooping out mud, weeds and sand
- 17. The backwards movement of sea water down a beach after a wave has broken

- 18. A broad inlet of the sea where the land curves inwards
 - 19. A curved build-up of eroded material that forms at the mouth of a river
 - 20. A hollow space along the coast produced by the action of the waves
 - 21. A hill or mound of sand formed by wind deposition on the landward side of a beach
 - 22. A strong wave that wears away coasts and removes material
- Down**
- 1. The building of physical structures to defend against the erosive power of waves
 - 4. The circular movement of water beneath the surface, creating waves
 - 5. A deposit of sand linking an island to the mainland (or to another island), formed by longshore drift

- 6. The wearing away of the Earth's surface by wind, water or ice
- 8. A shallow stretch of water which is partly or completely separated from the sea by a narrow strip of land
- 10. A natural feature, usually formed from rock, that forms a bridge-like arc as a result of erosion
- 12. A wall that is built out into the sea to help prevent erosion
- 13. A steep cliff jutting out into the sea
- 14. A man-made barrier that juts out from a beach into the water, made to prevent erosion of the beach from the power of destructive waves and longshore drift
- 15. The movement of water up the face of a beach after a wave has broken
