

GEOMETRY

Across

- 6.** A twelve sided polygon
8. A line segment which joins a circle centre to the edge of the circle
9. A line segment whose end points both lie on the edge of a circle
10. A line segment that passes through the centre of a circle
13. A portion of a circle which is cut off by two radii

- 14.** A four-sided polygon with four equal sides and equal diagonals
15. Numbers divisible by two
16. A line which passes through exactly one point on a circle
17. A four-sided polygon with diagonals which bisect each other

Down

- 1.** A seven sided polygon
2. The outer perimeter of a circle

- 3.** Any polygon with four straight sides
4. Clever or skillful in Maths (or other tasks)
5. The "father" of our school geometry
7. A four-sided polygon with only two pairs of equal adjacent sides
11. A parallelogram with equal diagonals
12. A part of the edge of a circle
