

# General Physiology Disorders

## Across

- 3.** One of the most common skin diseases  
**11.** Swelling of soft tissues caused by increased lymph  
**13.** Soft tissue trauma  
**15.** Broken bones caused by stress on the bone  
**17.** Can be benign or malignant  
**18.** Varicose or dilated veins in the anal canal  
**19.** Injury of a muscle that has been stretched beyond its capacity

**20.** Infection or inflammation of one or both testes

**21.** Heart muscle disease

## Down

- 1.** Impaired glucose uptake by the cells  
**2.** Non-specific dermatitis  
**4.** Loss of kidney function  
**5.** The heart can no longer pump an adequate supply of blood  
**6.** Suspected causes include smoking and air pollutants  
**7.** Inflammation of the peripheral lymphatic vessels

**8.** Erosion of the gastric mucosa that exposes it to gastric juice and pepsin

**9.** Chronic, progressive, degenerative disease with no cure

**10.** Inflammation of the bladder

**12.** Acute inflammation of the lungs

**14.** Enlargements of the normal ovarian structures

**16.** Injury to a joint
