

Name: _____

Date: _____

Genetic Mutations

Across

- 1. double rod of condensed DNA
- 7. When a single nucleotide is inserted into a gene
- 10. When part of a gene/chromosome is reversed
- 12. A chromosome breaks and attaches to another chromosome.

- 13. When a single or group of nucleotides are deleted from a gene
- 14. When a part of a chromosome is copied
- 15. When RNA is made from DNA

Down

- 2. Structure of RNA
- 3. Any change in the structure of a chromosome

- 4. When a single nucleotide in a gene is changed
- 5. What sugar is in RNA
- 6. What is it called when chromosomes do not separate correctly
- 8. Structure of DNA
- 9. genetic material
- 11. Where is DNA found
