

Genetics

Across

- 2. What the trait looks like
- 12. Passing of characteristics genetically through generations
- 13. DNA with instructions
- 14. Mixing of species through sexual reproduction
- 15. Model for predicting all possible genotypes

Down

- 1. The allele that is hidden by another
- 3. All of an organisms genetic material
- 4. Both alleles for a gene are different
- 5. Heterozygous genotype that equally expresses the traits from both alleles
- 6. Both alleles are the same

- 7. A particular even that will most likley happen
- 8. Set of alleles an organism has for a trait
- 9. The allele that is expressed
- 10. Alternative forms of a gene
- 11. Type of organism whose ancestors are genticly alleles
