

Name: _____

Date: _____

Genetics

Across

- 4.** Type of trait that has two identical alleles
7. Particle in cell that helps synthesize proteins
9. Cell division in sexually reproducing organisms
11. Identical alleles
13. Organism's genetic makeup

- 14.** A chart that shows possible combinations of alleles that result from a genetic cross

- 15.** Father of genetics

Down

- 1.** Different forms of a gene
2. Passing of traits from parents to offspring

- 3.** Organism that has two different alleles for a trait

- 5.** Different alleles

- 6.** Threadlike strand of DNA

- 8.** Organism's physical appearance or visible traits

- 10.** Type of trait with two different alleles

- 12.** Specialized part of a cell analogous to an organ
