

Genetics/ Traits

Across

- 7. Alternate forms of the same gene
- 8. Understand how traits are passed from generation to generation
- 9. Different alleles also known as mixed
- 10. Part of the DNA code on a chromosome

Down

- 1. Homozygous recessive, Homozygous dominant

- 2. Alleles will show their effect on phenotype whenever they are present
- 3. Alleles will only show their effect on phenotype when both alleles are present
- 4. Is the genetic makeup—the actual genes that a person has
- 5. What you see combination of genes and the environmental effect
- 6. Passing of traits from parents to offspring
