

# Genetics and Heredity

## Across

- 4. In RNA and DNA that pairs with cytosine
- 7. DNA containing structures found in the nucleus of a cell
- 8. Nuclei acid that pairs with thymine
- 10. Science of heredity that deals with heredity

## Down

- 1. Fundamental component of DNA & RNA that pairs with guanine
- 2. Pair of genes in chromosome that control characteristics
- 3. Spiral of two same strands of DNA
- 5. Organic molecules composed of amino acids
- 6. Characteristic/quality someone has
- 9. Deoxyribonucleic Acid
