

# Geology and Earth science

## Across

2. Rain fall made acidic by atmosphere pollution that causes environmental harm
6. The process where gas changes into a liquid
8. A layer of gases surrounding the planet.
9. Outer most layer of the earth
10. Thickest section of earth which sits underneath the crust.

## Down

1. The passage of water from plants into the atmosphere
3. Central part of earth
4. The process where liquid changes into a gas
5. Rocks formed by the cooling and solidifying of magma or lava
7. Layer of earth surrounding the inner core
