

Name: _____

Date: _____

Geometrey Vocabulary

Across

2. something that splits a segment down it's midpoint
 3. 2 angles with the same measure
 4. points on the same plane
 8. angle that is 90°
 13. the sum of the parts equal the whole
 16. a series of points
 17. points on the same line
 18. part of a line that has 2 endpoints
 22. an angle greater than 90°

23. flat surface with 3 or more points

25. angles that have a common side and vertex
 26. the sum of 2 angles that equals 180°
 27. something perpendicular to a segment at it's midpoint
 28. 2 lines that intersect at 90°

Down

1. 2 lines that never touch
 5. segments that have the same length
 6. angle less that 90°
 7. 2 angles that equal 90°

9. 2 intersecting lines that form 2 pairs of congruent angles

10. length between 2 points
 11. angle that equals 180°
 12. part of a line with one endpoint
 14. adjacent angles that are supplementary
 15. a location on a graph
 19. middle point of a segment
 20. something that divides an angle into 2 equal parts
 21. common endpoint of any angle
 24. intersection of 2 rays that share a common endpoint
